

## Greenhouse gas emissions declaration

Because of climate changes caused by human activity and driven by the need to take timely and responsible actions, VIDEOTON Bulgarian Holdings management is proud to announce that we have successfully surpassed our initial commitment to reduce GHG emissions intensity by 50% by Y2025.

In alignment with our Green Policy and as a participant in The Zero Carbon Project, managed by Schneider Electric, we transparently report our progress and GHG emissions figures.

### *GHG Emissions Overview*

	<i>Base Year</i> <b>2020</b>	<i>Most recent Year</i> <b>2024</b>
Scope 1 emissions (tCO <sub>2</sub> e)	11,82	9,28
Scope 2 emissions (tCO <sub>2</sub> e)	577,00	0,00
Scope 1+2 emissions (tCO <sub>2</sub> e)	588,82	9,28
<b>Reduction Scope 1+2 CO<sub>2</sub> emissions (%)</b>		<b>98,42%</b>
<b>Emissions intensity reduction (%)</b>		<b>98,90%</b>

*The amount of emissions is calculated using the emissions calculator on Zeigo Hub, provided by Schneider Electric, based on energy and fuel consumption.*

Thanks to our proactive sustainability efforts, investments in energy-efficient technologies, increased use of renewable energy, and collaboration with our partners, including the one-time allocation of GOs by Schneider Electric, we successfully achieved our target ahead of schedule.

**Our initial target was to reduce GHG emissions intensity by 50% by Y2025.**

**Finally, our total GHG emissions reduction for Scope 1 and Scope 2 amounts to 98,42%, while our GHG emissions intensity has been reduced by 98,90% from Y2020 to Y2024.**
